## PART 1

### Beyond the Buzzword: Understanding AI in Education

9:00 am - 11:30 am | \$25

Artificial intelligence is here, and unlike what you've seen in the movies, AI isn't coming to destroy humans - it's coming to disrupt our classrooms. Should educators be afraid, excited, or both? Can educators embrace AI's potential while ensuring their students still learn the value of creating original work?

Join us as we cut through the AI buzz and examine the implications of artificial intelligence in an educational setting. We'll start by outlining AI fundamentals before exploring the benefits and challenges AI presents in both teaching and learning. Along the way, we'll also address many educator's top concerns regarding AI, including plagiarism, bias, and over reliance.

By the end, educators will possess a practical understanding of core AI concepts, empowering them to make informed decisions about its integration into their practice. Whether you're an AI novice or simply seeking clarity, this workshop will provide a solid foundation for embracing AI's potential in your classroom.

## PART 2

### AI in Action: Practical Applications for the Classroom

12:30 pm - 3:00 pm | \$25

You know the basics of AI in education. Now, let's put those fundamentals into practice, starting with this hands-on workshop focused on integrating AI into your student's learning experience.

We'll start by highlighting several tools and strategies you can harness to enhance student learning, foster creativity, and personalize instruction. From there, we'll explore real-world examples of AI integration across various subjects and grade levels, as well as examine how educators can empower students to leverage AI responsibly and ethically.

If you're ready to take the next step, this workshop will equip you with the confidence and skills to implement AI effectively. Join us to take a firm stride toward bringing AI's full educational potential into your classroom!
